

#### Brief description of your civic monitoring research:

A consolidation of socio-educational care services aimed at children and people with limitations of autonomy. It focuses on the economic support of families, children, and women.

#### Contextual information:

The Liguria nursery voucher has an amount that depends on the ISEE value: €200 per month (up to 10 months) for families with an ISEE up to €10,000, or €100 pm for families with an ISEE between €10,000 and €20,000.

#### Chosen project and theme:

NAME: provision of inclusion nursery voucher.

THEME: social inclusion and health.

New voucher in support of families with young children from a disadvantaged background.

#### Experts on the theme:

Municipality of Genoa and Liguria

The ASOC friend “Kiwanis Club Genova Columbus”

#### Communication format and Involvement strategy:

We decided to use the podcast format as a strategy to engage the local community, on top of the use of social media (Facebook, Instagram, Tiktok) to keep open an accessible channel to our progress.

#### Additional research:

1. interviews
2. questionnaires
3. diaries and reportage

#### Value for the community:

We will aim to raise awareness for the project, to make sure that its existence reaches everyone that could be in need of it. The spread of awareness is essential for the effectiveness of the project as it could be an opportunity for families to improve their lifestyle, and for young mothers to seek independence. Ultimately this project is a great service for the community, that will benefit from it as a whole and it should be appropriately divulged.
