

Stop in Square

Aversa

Description of our research

CUP: : I33G10000180001

Our research on civic monitoring focuses on enhancing and restoring the churchyards of our town historical center reducing the problems caused by urban transformation

Context data

Scheduled start: 19/10/2016
Actual start: 19/10/2016
Scheduled end: 30/06/2021

Public cost:
€ 2,923,758.87
Amount paid:
€ 2,763,062.78

Although the amount paid sums up to 94% of the total, works have been carried out on 1,600 square metres, which is half of the foreseen surface that is 3,250 square metres

Additional researches

We wish to

1. catch the attention of our school to enlighten our classmates;
2. spread our message among our families;
3. to involve the entire Aversa community, who should care about the flourishing of their own territory more than anyone else.
4. We ask for a dialogue with the administration of Aversa to discuss what concerns our cultural heritage in order to make our city a better place.

keywords

- European funds
- recovery
- historical centre
- historical heritage
- churchyards

Project and topic chosen from OpenCoesione website

STOP IN SQUARE aims at recovering and renovating the historical centre of Aversa in an attempt to reduce the issues caused by the growing urbanisation

The project will be developed through our studies of documents and data research and thanks to a dialogue with the administration of Aversa to discuss what concerns our cultural heritage

Communication strategy

• Posts on social media
• Meetings in which our project will be explained
